[linkedin.com/in/hamad-riyaz-3983b63b3](https://www.linkedin.com/in/hamad-riyaz-3983b63b3)

PROFESSIONAL SUMMARY

Analytical and detail-oriented **BS Data Science** student with a **3.78 CGPA**, possessing strong hands-on expertise in data manipulation, web scraping, statistical data analysis, and basic machine learning. Highly skilled in Python, Pandas, NumPy, SQL, and CSV handling. Proven track record of turning raw unstructured data into actionable insights through custom scrapers and predictive ML models. Seeking a **Data Analyst / Data Science Internship** to leverage data-driven problem-solving capabilities.

EDUCATION

GIFT University, Gujranwala

Expected Graduation: 2027/2028

Bachelor of Science in Data Science (BS Data Science) — CGPA: 3.78 / 4.00

- **Relevant Coursework:** Data Analysis & Manipulation, Machine Learning Basics, Database Management Systems (SQL), Data Structures & Algorithms (DSA), Computer Networks.

TECHNICAL SKILLS

Data Analysis & ML:	Pandas, NumPy, CSV Data Handling, Web Scraping, Data Cleaning, Sentiment Analysis
Languages & DB:	Python, SQL (MySQL), Java, PHP, HTML5, CSS3
Core Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Data Pipeline Basics
Tools & Utilities:	Cisco Packet Tracer, Command Line Interface (CLI), Generative AI & Prompt Engineering

DATA SCIENCE & ANALYTICS PROJECTS

Web Scraping & CSV Data Processing Pipeline

Python, Pandas, NumPy

- Engineered custom Python web scraping scripts to extract semi-structured web data and clean raw datasets.
- Utilized **Pandas** and **NumPy** for data cleaning, transforming missing values, and generating structured CSV files for downstream analysis.

Sentiment Analysis Model

Python, Scikit-Learn / ML Basics

- Developed a machine learning classification model to analyze text data and categorize user sentiment.
- Performed text preprocessing, feature extraction, and simple model evaluations to accurately classify sentiments.

Interactive AI Tic-Tac-Toe Game

Python, Decision Logic

- Designed an interactive game interface integrated with decision-making AI logic, allowing players to compete against an adaptive computer algorithm.

Full-Stack Bus Reservation Database System

PHP, MySQL, HTML, CSS

- Designed dynamic SQL database schemas to handle seat availability, user reservations, and bus schedules.

CERTIFICATIONS

- **Start Writing Prompts like a Pro** — Authorized by *Google* via Coursera
- **Design Prompts for Everyday Work Tasks** — Authorized by *Google* via Coursera

KEY STRENGTHS & SOFT SKILLS

- **Analytical Thinking:** Strong focus on data accuracy, pattern recognition, and mathematical logic.

- **Technical Communication:** Excellent written and verbal communication skills; future-oriented mindset.
